

Directions for using Epay on Ashley Direct:

On the Epay screen, you will need to select the invoice(s) that you wish to pay. Any prior invoices that you have paid through Epay will be greyed out which will prevent errors in duplicate payments.

Once you have selected the invoices you want to pay, click on Make Payment. This will bring up a summary screen, which will show a list of invoices selected for payment and the total of your payment. If this information is not correct, press cancel and you can start over. If you agree with the amount of the payment, click OK.

At this time you will be forwarded to the US Bank Website, where you will see your payment amount and the date the payment will take place. You can only do payments for the next day, no recurring payments and no partial payments will be accepted.

On the next pages, you will enter in your bank information and complete your contact information. Ashley will send over most of your contact info but you will need to complete the empty spaces.

No banking information is saved after you finish your transaction.

On the Verify Payment Screen, you will need to enter your Ashley customer number that appears on Ashley Direct and agree to the terms and conditions.

Your payment is not complete until you have accepted the terms and conditions and received your payment confirmation.

You will receive a confirmation email stating that your payment has gone through. You may want to save this for your records, Ashley will use the last 6 digits of your confirmation number as your check number when posting your payment.

After we get the payment confirmation from the bank, the invoice status will show "payment" until the transaction is posted. The system will not allow you to pay the same invoice twice.

If your payment errors out, you will receive notification from US Bank and the status field will be cleared.

After you process a payment, you will need to hit refresh to see the status change on your invoices.

All payments that receive a payment confirmation prior to 8pm cst will be withdrawn from your account the next business day. All payments after 8 pm will be processed 2 business days later.
